Warehousing & distribution

Air Freight Forwarding

The fastest and most flexible way to move goods

Extensive hub network with frequent departures and broad coverage

Using leading capacity carriers - integrating airfreight with local transportation, customs brokerage and document handling.

Flexibility above all - our personal attention and care, leveraging our size to ensure space, handling service changes and solving any logistical challenges

Services

- Priority – next flight out
- Standard – daily uplift
- Economy – consolidation
- Sea-Air & Air-Sea - airfreight multimodal services reducing cost and improving service speed

Ocean Freight Forwarding

Full service solutions in more than 200 countries worldwide

Extensive port network, providing daily departures out of hundreds of origins.

Complete service offering – integrating ocean freight with local transportation, customs brokerage and document handling.

Reliability above all - our personal attention and care, leveraging our size to ensure space, handling service changes and solving any logistical challenges

Services

- Full-container loads working with several global carrier partners
- Less-than-container loads with regular departures, fixed freight station closings and reliable transit times
- Multi-country consolidation

Landside services

A team of experts dedicated to supply chain excellence

Rich experience in managing complex flow of goods, information and financials.

Process discipline and consistent reliability above 97% ensuring low variability and lower operating costs.

Sophisticated IT solutions to support end-to-end processes and visibility.

Key account management structure tailored to individual customer solutions

Services

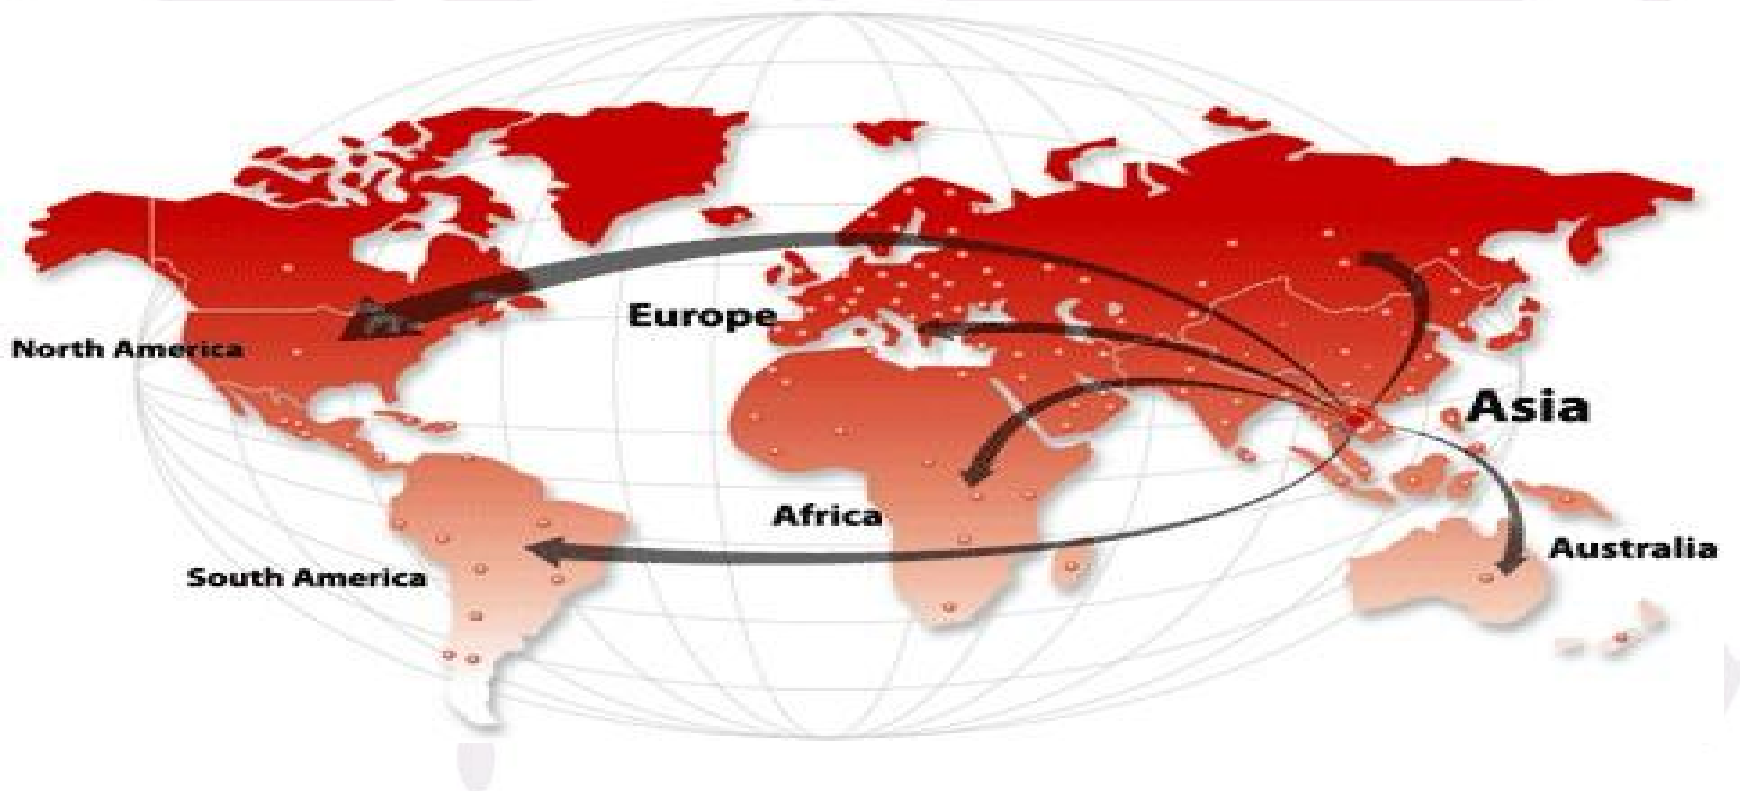

- Developing and implementing solutions - managing execution across multiple supply chain elements
- Delivering visibility and information
- Driving continuous improvements through supply chain development
